

Greetings to all.

A month ago, we bought you a license to use your LaraShip system. When configuring and trying to use the user registry, it throws an error, the result is "throw new Swift_RfcComplianceException ('Address in mailbox given ['. \$ address. '] does not comply with RFC 2822, 3.6.2.');" , I comment that in the users table, insert only the user id, the empty name field and the rest null, we have correctly configured the .env file and we have collated the account that we have for testing in smtp.mailtrap.io, too We have tried it with gmail, with other applications that we have it works, but here it is giving us this error. Please can you help us, as we need this functionality. The error is not giving in this file vendor / swiftmailer / swiftmailer / lib / classes / Swift / Mime / Headers / MailboxHeader.php on line 355.

Thanks in advance for helping us.

In this image we start the registration for a new user

The image shows a registration form with the following fields and values:

- Your Name: Tarsicio
- Last Name: Carrizales
- Email Address: telecom.com.ve@gmail.com
- Password: *****
- Vuelvo A Escribir La Contraseña: *****
- Estoy De Acuerdo Con La Condiciones
- Registrarse button
- Ya tienes una cuenta? [Iniciar sección](#)

This is how the users table is before registering the new user

id	name	last_name	email	password	address
1	Super	User	superuser@corals.io	\$2y\$10\$jYm17kQlnzCgl.aZu/f7k.pGw9ntbZWtz...	NULL
2	Corals	Member	member@corals.io	\$2y\$10\$FOr6bD.Ti85aS6aXceSsAea4o5mL4Q...	NULL
NULL	NULL	NULL	NULL	NULL	NULL

After trying to register the new user, it gives us the following error

y en la tabla users sólo carga los siguientes datos

The screenshot shows a database table named 'users' with the following columns: id, name, last_name, email, password, and address. The table contains three rows of data:

id	name	last_name	email	password	address
1	Super	User	superuser@corals.io	\$2y\$10\$jYm17kQlnzCgl.aZu/f7k.pGw9ntbZWtz...	NULL
2	Corals	Member	member@corals.io	\$2y\$10\$FOr6bD.Ti85aS6aXceSsAea4o5mL4Q...	NULL
30		NULL			NULL

The following are the messages presenting the application in debug mode

#1 register (13:08:27)#2 unread-in-url?current_url=%2Fregister (ajax) (13:08:29)#3 register (ajax) (13:09:51)#4 register (ajax) (13:11:56)7.4.152.94s10MBPOST register
